TROPICAL CYCLONE BULLETIN NR. 10
Tropical Storm ADA (NOKAEN)

Issued at 5:00 PM, 16 January 2026
Valid for broadcast until the next bulletin at 11:00 PM today.

"ADA" MAINTAINS ITS STRENGTH AS IT MOVES NORTHWESTWARD OVER THE SEA EAST OF EASTERN VISAYAS.

Location of Center (4:00 PM)

The center of Tropical Storm ADA was estimated based on all available data at **255 km East Northeast of Borongan City, Eastern Samar or 335 km East of Catarman, Northern Samar (12.3°N, 127.7°E).**

Intensity

Maximum sustained winds of **65 km/h** near the center, gustiness of up to **80 km/h**, and central pressure of **998 hPa**

Present Movement

Northwestward at 20 km/h

Extent of Tropical Cyclone Winds

Strong to gale-force winds extend outwards up to **400 km** from the center

Tropical Storm ADA (NOKAEN)
Issued at 5:00 PM, 16 January 2026
Valid for broadcast until the next bulletin at 11:00 PM today.

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT			
TCWS No.	**Luzon**	**Visayas**	**Mindanao**
1 Wind threat: **Strong winds**	**The southern portion of Quezon** (San Narciso, Mulanay, San Francisco, San Andres, Buenavista, Catanauan, Lopez, Calauag, Guinayangan, Tagkawayan)**, Camarines Norte, Camarines Sur, Catanduanes, Albay, Sorsogon, and Masbate**	**Northern Samar, Samar, Eastern Samar, Biliran, Leyte, Southern Leyte, and the northern portion of Cebu** (Medellin, Daanbantayan, San Remigio, City of Bogo, Tabogon) **including Camotes Islands and Bantayan Islands**	**Dinagat Islands and Siargao - Bucas Grande Islands**
	Warning lead time: **36 hours** Range of wind speeds: **39 to 61 km/h (Beaufort 6 to 7)** Potential impacts of winds: **Minimal to minor threat to life and property**		

OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to Weather Advisory No. 10 issued at 5:00 PM today for the heavy rainfall outlook due to Tropical Cyclone ADA.

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

The highest Wind Signal that may be hoisted throughout the passage of ADA is Wind Signal No. 2.

The Northeast Monsoon and the periphery of ADA will also bring strong to gale-force gusts over the following areas (especially in coastal and upland areas exposed to winds):

- **Today:** Batanes, Babuyan Islands, Ilocos Norte, Aurora, Quezon, Lubang Islands, Oriental Mindoro, Romblon, Marinduque, Cuyo Islands, Bicol Region, Visayas, Surigao del Norte, Agusan del Norte, Surigao del Sur Davao Oriental, Davao Occidental, and Sarangani.
- **Tomorrow (17 January):** Batanes, Babuyan Islands, northern and eastern mainland Cagayan, eastern Isabela, Ilocos Norte, Aurora, Quezon, Oriental Mindoro, Romblon, Marinduque, Cuyo Islands, Bicol Region, Visayas, Dinagat Islands, and Surigao del Norte.
- **Sunday (18 January):** Batanes, Cagayan, Isabela, Quirino, Ilocos Norte, Abra, Ilocos Sur, Quezon, Marinduque, Romblon, Bicol Region, and Eastern Visayas

Coastal Flooding

There is a **minimal to moderate risk of storm surge** with peak heights **reaching up to 2.0 m** within the next 48 hours over the low-lying or exposed coastal communities of Camarines Sur, Catanduanes, Albay, Sorsogon, Northern Samar, Eastern Samar, and Samar. **Refer to Storm Surge Warning No. 4 issued at 2:00 PM today for more details.**

TROPICAL CYCLONE BULLETIN NR. 10
Tropical Storm ADA (NOKAEN)
Issued at 5:00 PM, 16 January 2026
Valid for broadcast until the next bulletin at 11:00 PM today.

HAZARDS AFFECTING COASTAL WATERS

A Gale Warning is in effect over the eastern seaboards of Southern Luzon and Visayas. For more details, refer to Gale Warning No. 1 issued at 5:00 PM today.

24-Hour Sea Condition Outlook

Up to very rough seas over the following coastal waters:

- **Up to 5.0 m:** The eastern seaboards of Catanduanes, Albay, and Sorsogon; the northern and eastern seaboards of Northern Samar.
- **Up to 4.5 m:** The seaboard of Camarines Norte; the northern seaboard of Camarines Sur and Catanduanes.
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- **Up to 4.0 m:** The northern and eastern seaboards of Polillo Islands; the eastern seaboard of Eastern Samar.
- **Up to 3.5 m:** The seaboards of Isabela, Aurora, and northern mainland Quezon.
- **Up to 3.0 m:** The seaboard of Babuyan Islands; the eastern seaboard of mainland Cagayan, Camarines Sur and Dinagat Islands; the northern and eastern seaboards of Siargao-Bucas Grande Islands; the remaining seaboards of Catanduanes.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced or operating ill-equipped vessels.**

Up to moderate seas over the following coastal waters:

- **Up to 2.5 m:** The seaboards of Batanes, Ilocos Norte, Surigao del Sur and Davao Occidental; the northern seaboard of mainland Cagayan; the eastern seaboards of Surigao del Sur and Davao Oriental.
- **Up to 2.0 m:** The seaboards of Marinduque, Romblon, Cuyo Islands, Cagayancillo Islands, Aklan, Capiz, Antique, northern mainland Cebu, Bantayan Islands, Camotes Islands, Agusan del Norte, and Southern Leyte; the northern and western seaboards of Surigao del Norte and Dinagat Islands; the remaining seaboards of Quezon, Bicol Region and Eastern Visayas.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

Other coastal waters have wave heights of less than 2.0 m.

TROPICAL CYCLONE BULLETIN NR. 10
Tropical Storm ADA (NOKAEN)
Issued at 5:00 PM, 16 January 2026
Valid for broadcast until the next bulletin at 11:00 PM today.

TRACK AND INTENSITY OUTLOOK

- **It must be emphasized that heavy rainfall and severe winds may still be experienced in localities outside the landfall point and the forecast confidence cone. Refer to "Other Hazards affecting Land Areas" for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.**
- ADA will move generally northwestward today through tomorrow (17 January) before turning slowly north northwestward to northeastward by Sunday (18 January). From Sunday onwards, ADA is forecast to move slowly or become almost stationary over the sea northeast of Catanduanes. On the forecast track, the center of ADA may pass close to Eastern Samar and Northern Samar tomorrow, and near Catanduanes from tomorrow evening through Sunday. A further westward shift in the forecast track may result in a possible landfall over Eastern Visayas and Bicol Region.
- The forecast track may change in succeeding bulletins, particularly for the period from tomorrow onwards.
- ADA is forecast to remain a tropical storm category while moving over the sea east of Visayas and Southern Luzon. This tropical cyclone may weaken into a tropical depression by Tuesday (20 January), and into a remnant low by Wednesday (21 January) due to the effects of the surge of the northeast monsoon.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 PM today.
